There is significant variation in the number of households who live below the ALICE Threshold within the county. How Does the Number of ALICE Households Vary within the County?

A breakdown of the labor force shows a small portion of adults (16 years and older) who are unemployed and the labor landscape is challenging for ALICE workers. While conditions have improved for some households, many continue to struggle, especially as wages fail to keep pace with the cost of household essentials (housing, child care, food, transportation, health care, and a basic smartphone plan).

Why Do So Many Households Struggle?

The Household Survival Budget reflects the bare minimum cost to live and work in the modern economy and what it includes:

- Housing
- Child care
- Food
- Transportation
- Health care
- Technology (a smartphone plan)

The cost of household basics outpaces wages…

What Types of Households Are Struggling?

Households exist across all of these living arrangements. Yet all types of households continue to struggle: ALICE and poverty-level households, single adults living alone or with roommates, and an increasing share of grown children who live with their parents. ALICE thresholds are also high numbers of workers outside the labor force (people who are not employed and not looking for work). Use the tool below to create a County Profile of key aspects of all counties in the state, including details related to county demographics, the cost of living, and the labor landscape.
